Digital Acceptance

Introduction to Digital Inclusion

- Definition: Ensuring everyone has equal access and ability to use digital technologies.
- Importance: Bridges gaps in education, economy, and social engagement.
- Key Pillars:
 - Digital Accessibility
 - Digital Literacy
 - Digital Acceptance

What is Digital Accessibility?

- Refers to designing digital products/services usable by people of all abilities.
- Includes:
 - Visual (e.g., screen readers, contrast)
 - Auditory (e.g., captions, transcripts)
 - Motor (e.g., keyboard navigation)
 - Cognitive (e.g., simple layouts, easy navigation)
- Based on Web Content Accessibility Guideline (WCAG)

Why Digital Accessibility Matters

Legal compliance: e.g., ADA, EU Accessibility Act.

Inclusion of Persons with Disabilities (PwD)

Improves UX for all (e.g., captions help in noisy places)

Expands audience and market reach

Digital Literacy – A Core Skill

- Definition: Ability to find, evaluate, use, share, and create content using digital tools.
- Components:
 - Information Literacy (ICT)
 - Basic ICT Skills (e.g., email, Word, Google tools)
 - Media Literacy (Media)
 - Online Safety Skills

Barriers to Digital Literacy

Lack of access to devices or internet

Low education levels

Age-related challenges

Language and cultural limitations

Strategies to Promote Digital Literacy

What is Digital Acceptance?

Willingness to adopt and trust digital technology.

Influenced by:

- Perceived usefulness
- Ease of use
- Peer and societal influences
- Cultural values

Linked to Technology Acceptance Model (TAM)

Challenges to Digital Acceptance

Fear of change or job displacement

Privacy/security concerns

Lack of perceived benefit

Generational resistance (e.g., older adults)

Encouraging Digital Acceptance

Interlinking the Three Pillars

All THREE must work together for inclusion

Accessibility enables access.

Literacy empowers usage.

Acceptance ensures engagement.

Case Study: Digital Inclusion in Practice

Choose a real-world initiative (e.g., Malaysia's MyDigital initiative or Estonia's e-Government model)

Explain how it addresses accessibility, literacy, and acceptance.

Case Study: Malaysia's MyDigital Initiative

- National initiative to transform Malaysia into a digitally-driven, high income nation.
- Focuses on expanding digital infrastructure and bridging digital divide.
- Includes digital literacy programs for citizens and businesses.
- Emphasizes accessibility in public digital services.
- Aims to build trust and promote digital acceptance through secure platforms.
