

CHAPTER 4 (PART II): PLAGIARISM

AP Ts. DR. LILY N

Say No To Plagiarism

WHAT IS PLAGIARISM?

(And why you should care!)

Say No To Plagiarism

DID YOU KNOW?

- The word plagiarism comes from the Latin plagiarius means "kidnapper"
- It is **intellectual theft**
- It is a serious scientific misconduct

PLAGIARISM

- Many people think of plagiarism as copying another's work or **borrowing** someone else's original ideas.
- But terms like "copying" and "borrowing" can disguise the **seriousness of the offense.**
- In other words, plagiarism is an act of **fraud**. It involves both stealing someone else's work and lying about it afterward.

PLAGIARISM

- According to the Merriam-Webster online dictionary, to "plagiarize" means:
 - to steal and pass off (the ideas or words of another) as one's own
 - to use (another's production) without crediting the source
 - to commit literary theft
 - to present as new and original an idea or product derived from an existing source
 - to use someone else's ideas without attribution
 - to use someone else's words without attribution
 - to cite the source incorrectly

PLAGIARISM

- All of the following are considered plagiarism:
 - **turning** in someone else's work as your own
 - **copying words or ideas** from someone else without giving credit
 - **failing to put a quotation** in quotation marks
 - **giving incorrect information** about the source of a quotation
 - **changing words** but copying the sentence structure of a source without giving credit
 - **copying so many words** or ideas from a source that it makes up the majority of your work, whether you give credit or not

PLAGIARISM

- Paradise Valley Community College's Definition of Plagiarism
 - Plagiarism includes, but is not limited to, the use of paraphrase or direct quotation of the published or unpublished work of another person without full and clear acknowledgment.
 - It also includes the unacknowledged use of materials prepared by another person or agency engaged in the selling of term papers or other academic materials.
 - Information gathered from the Internet and not properly identified is also considered plagiarism.

PLAGIARISM

Plagiarism

Plagiarism is a very serious offence under the University's regulations on cheating and will be penalised. Students' attention is drawn to this Regulation 11 in the University Calendar, a copy of which is available on the University website.
<http://www2.warwick.ac.uk/insite/info/gov/calendar/section2/regulations/cheating/>

Plagiarism is a form of misconduct and is defined as taking and using another person's thoughts and presenting them as if they were one's own. Plagiarism is construed by the Department of Politics and International Studies as any of the following:

- (a) the inclusion in your essay of passages, sentences or even phrases quoted directly from other authors without acknowledgement by quotation marks and appropriate references;
or
 - (b) the unacknowledged paraphrasing of the work of other authors, i.e. the representation, even in your words, of the work of other authors without a proper reference to the original source;
or
 - (c) the use of arguments (or parts of arguments) derived from other authors, and the presentation of evidence taken from other authors without proper references.
- (d) copying another student's work and pretending it is your own.
- or
- (e) downloading an essay from the Internet and pretending it is your own. Students should not under any circumstances use web based, or hard copy

PLAGIARISM

- Plagiarism is the presenting the words, ideas, images, sounds, or the creative expression of **others as your own**.
- Using another's exact words **without proper citation**

Plagiarism is
plagiarism...
irrespective of
Intent, Source,
Quantity and
Copyright

CYBER-PLAGIARISM?

- Copying ideas, text, material from the web without proper accreditation
- **Digital plagiarism** is a term used to describe copying using computers

Creativity is fine
but plagiarism is
faster...hmmm

IMAGES, AUDIO, MUSIC, VIDEOS?

- Using an image, video or piece of music in a work you have produced without receiving proper permission or providing appropriate citation is plagiarism.
- The following activities are very common in today's society. Despite their popularity, they still count as plagiarism.
 - **Copying media** (especially images) from other websites to paste them into your own papers or websites.
 - **Making a video** using footage from others' videos or using copyrighted music as part of the soundtrack.
 - **Performing another person's copyrighted** music (i.e., playing a cover).
 - **Composing a piece of music that borrows** heavily from another composition.

Why is plagiarism a bad thing?

- Because it **infringes academic ethics** and academic norms
- Because it is a **form of theft** and a type of fraud
- Because plagiarists ultimately cheat themselves
- Because plagiarists **cheat their fellow friends**
- Because plagiarism **reflects incompetence**

WHAT HAPPENS TO PLAGIARISTS?

© Original Artist
Reproduction rights obtainable from
www.CartoonStock.com

“It’s not the same. I was caught stealing office supplies. You on the other hand, got caught stealing ideas.”

What happens to plagiarists?

- The consequences are **not worth** the risks!
 - Students who plagiarize or otherwise engage in academic dishonesty face serious consequences.
 - Sanctions may include, but are not limited to, failure on an assignment, grade reduction or course failure, suspension, and possibly dismissal.
 - Possible disciplinary action by the University
 - Many students are accused of plagiarism because they simply don't understand it and, therefore, don't know how to avoid it.
 - Cheating is unethical behavior

WHAT HAPPENS TO PLAGIARISTS?

- In a survey of 24,000 students at 70 high schools, Donald McCabe (Rutgers University) found that:
 - **64 percent** of students admitted to cheating on a test,
 - **58 percent** admitted to plagiarism and
 - **95 percent** said they participated in some form of cheating, whether it was on a test, plagiarism or copying homework.

WHAT HAPPENS TO PLAGIARISTS?

“A study of 4,500 students at 25 schools:

72% admitted to serious cheating on written assignments using the Internet.”

Based on the research of Donald L. McCabe, Rutgers University
Source: “CIA Research.” Center for Academic Integrity, Duke University, 2003

<http://academicintegrity.org/cai_research.asp>.

WHAT HAPPENS TO PLAGIARISTS?

- A survey of over 63,700 US undergraduate and 9,250 graduate students over the course of three years (2012-2015)--conducted by Donald McCabe, Rutgers University--revealed the following:
 - 36% of undergraduates admit to “paraphrasing/copying few sentences from Internet source without footnoting it.”
 - 24% of graduate students self report doing the same
 - 38% admit to “paraphrasing/copying few sentences from written source without footnoting it.”
 - 25% of graduate students self report doing the same
 - 14% of students admit to “fabricating/falsifying a bibliography”
 - 7% of graduate students self report doing the same
 - 7% self report copying materials “almost word for word from a written source without citation.”
 - 4% of graduate students self report doing the same
 - 7% self report “turning in work done by another.”
 - 3% of graduate students self report doing the same
 - 3% report “obtaining paper from term paper mill.”
 - 2% of graduate students report doing so

WHAT HAPPENS TO PLAGIARISTS?

Saturday, March 17, 2007 - R. A. Mashelkar resigns from patent panel following plagiarism charge

- Dr. Mashelkar confirmed to *The Hindu* that certain lines used in their report's conclusion had been taken "verbatim" from a November 2005 paper that was authored by Shamnad Basheer, a doctoral student and an Associate at the Oxford Intellectual Property Research Centre, University of Oxford. (Feb 22, 2007)

Source: The Hindu

WHAT HAPPENS TO PLAGIARISTS?

■ MALAYSIA CASES:

- An executive director of a private college of higher education affiliated with a UK university, and pop star Fazley Yaakob was found to hold two fake degrees, and two public company directors were also found to have fake degrees.
- If a former MBA student of University of Bath had not done a Google search, he would not have discovered that University Technology Mara had illegally deposited in its library 14 academic theses done by students who graduated with MBA from Bath in 1994.
- Plagiarism is not just confined to books. Australian Masterchef finalist Alvin Quah was accused of plagiarism by Rasa Malaysia's Bee Yin Low from the Asian food blog Rasa Malaysia.

WHAT HAPPENS TO PLAGIARISTS?

■ MALAYSIA CASES:

- Adeline Lee Zhia Ern, a Malaysian writer, was caught plagiarizing Jack Canfield's Chicken Soup for the Soul IV in her first book Lethal Lesson and Other Stories, and her book was withdrawn from the market and destroyed.
- An editor working for the New Straits Times, Brendan Pereira, was dismissed for plagiarizing the work of U.S. journalist Mitch Albom. Last year, the Malaysian national news agency Bernama suspended a journalist for plagiarizing an article from the Jakarta Post.
- Back in 2013, an Utusan Malaysia writer Ridhuan Tee was accused of plagiarism by a Universiti Teknologi Malaysia lecturer Dr Aril Yasreen Mohd. Yassin. Although the matter was never resolved, Ridhuan Tee was appointed an associate professor at Universiti Pertahanan Nasional Malaysia (National Defence University).

WHAT HAPPENS TO PLAGIARISTS?

- The study went on to state that 95.7% of students had partaken in some form of plagiarism, 96% had shared an assignment with other students, 93% had cheated during tests, 92% had falsified data, 86% had cheated in exams, and 90% had copied a friends assignment.
- Two Universiti Putra Malaysia (UPM) lecturers who were caught plagiarizing materials from the internet to produce an effective writing handbook. The action taken against the authors was only a reprimand.
- A similar case involving a Dean from one of the faculty in UMK was 'pushed under the rug'. The issue on plagiarism is successfully justified that the Plaintiff's PHD Thesis was copied exactly from the writing of Viola Shafiq from the book of "Arab Cinema". However the IEEE banned any papers from the academic in any of their journals for 10 years.

WHAT HAPPENS TO PLAGIARISTS?

- Most cases of plagiarism can be avoided, however, by citing sources.
- Simply acknowledging that certain material has been borrowed and providing your audience with the information necessary to find that source is usually enough to prevent plagiarism.
- BUT STILL...

WHY DO PEOPLE PLAGIARIZE?

- Ignorance
- Lack of knowledge on the ethics of scholarly writing / poor writing skills
- Ambition, fierce competition
- Pressure from seniors
- Publish or perish system
- Faster and easy
- Chances of getting caught or action being taken is slim
- The pressure of workload
- Pressure to succeed

WHY DO PEOPLE PLAGIARIZE?

Everyone does it!

It's okay if
I don't get caught!

This assignment
was BORING!

I was too busy to
write that paper!
(Job, big game, too much homework!)

I've got to get
into a
certain college.!

My teachers
expect
too much!

My parents
expect "A"s!

A PLAGIARIST IS:

- Too **careless**
- Too **lazy**
- Too **dishonest**

By Cindy Nottage

PREVENTING PLAGIARISM

- Quote and cite phrases, sentences, and paragraphs taken directly from the original source.
- Quote and cite statistics, charts, graphs and drawings taken directly from the original source.
- When you paraphrase or summarize, give credit to the original author.

Do I have
to cite
everything?

ANSWER: YES!!

Except –

- When you use your own words
- When the fact used is **common knowledge**.

What makes it “common knowledge”?

If you can find the same information in **at least 3 different sources**, you don't have to cite it.

Ex. George Washington wore wooden dentures.

WHAT'S THE BIG DEAL?

If I change a few words, I'm still okay, right?

Wrong! Paraphrasing original ideas without documenting your source, is plagiarism too!

AVOIDING PLAGIARISM

- For short quotes, use quotation marks in the sentence.
- For longer quotes indent the entire passage
- If you have used a table, chart, diagram etc., cite the source directly below with a statement that permission has been obtained.
- “All sources should be disclosed and, if large amounts of other people's written or illustrative material are to be used, permission must be sought.” COPE, 1999.

Even if you change a few words here and there it is considered plagiarism

USE THESE THREE STRATEGIES

- Quoting
- Paraphrasing
- Summarizing

*To blend source materials in with your own,
making sure your own voice is heard.*

QUOTING

Quotations are the exact words of an author, copied directly from a source, word for word. Quotations must be cited!

pl Rohrbach and Joyce Valenza

WHEN QUOTING DIRECTLY

- Keep the person's name near the quote in your notes, and in your paper
- Select those direct quotes that make the most impact in your paper -- too many direct quotes may lessen your credibility and interfere with your style
- Mention the person's name either at the beginning of the quote, in the middle, or at the end
- Put quotation marks around the text that you are quoting
- Indicate added phrases in brackets ([]) and omitted text with ellipses (. . .)
- Ensure you note exact page numbers in the reference

WHEN QUOTING INDIRECTLY

- Keep the person's name near the text in your notes, and in your paper
- Rewrite the key ideas using different words and sentence structures than the original text
- Mention the person's name either at the beginning of the information, or in the middle, or at that end
- Double check to make sure that your words and sentence structures are different than the original text
- Ensure you note exact page numbers in the reference

WHEN PARAPHRASING

Paraphrasing means putting someone else's words or ideas into your own words.

Although you are using your own words, the ideas are taken from someone else and must be cited on your Works-Cited page.

PARAPHRASING

- Paraphrasing is not simply rearranging or rewording an original passage.
- You have to understand what the author is saying and write the ideas entirely in your own words.

PARAPHRASING

- Give the author credit when you quote or paraphrase.

- Eg:
- “According to Jim Carty, the CATS are ranked fourth in backcourts this year with Rondo, Sparks, Crawford, Bradley, and Moss.”

PARAPHRASING

- Paraphrasing is the act of rephrasing a text in your own words.
- Paraphrasing is the most common type of plagiarism.
- Paraphrasing itself is not plagiarism so long as you properly cite your sources.
- However, paraphrasing becomes plagiarism when you read different sources, pull out the key points and then rewrite these points as if they were your own ideas.

CITING PARAPHRASING

- Paraphrased material must be cited. Even though paraphrasing means that you are restating information in your own words, you must give credit to the original source of the information.
- Citations for paraphrased material should always include both the author and the year. In-text citation can be placed within the sentence or at the end:
- Example: According to Johnson (2012), mirror neurons may be connected with empathy and imitation.
- Example: Mirror neurons may be connected with empathy and imitation in human beings (Johnson, 2012).

PARAPHRASING

■ Given:

- *Because the intracellular concentration of potassium ions is relatively high, potassium ions tend to diffuse out of the cell. This movement is driven by the concentration gradient for potassium ions. Similarly, the concentration gradient for sodium ions tends to promote their movement into the cell. However, the cell membrane is significantly more permeable to potassium ions than to sodium ions. As a result, potassium ions diffuse out of the cell faster than sodium ions enter the cytoplasm. The cell therefore experiences a net loss of positive charges, and as a result the interior of the cell membrane contains an excess of negative charges, primarily from negatively charged proteins.¹ (p. 204).*

PARAPHRASING

- Here is an Appropriate Paraphrase of the above material:
- *A textbook of anatomy and physiology¹ reports that the concentration of potassium ions inside of the cell is relatively high and, consequently, some potassium tends to escape out of the cell. Just the opposite occurs with sodium ions. Their concentration outside of the cell causes sodium ions to cross the membrane into the cell, but they do so at a slower rate. According to these authors, this is because the permeability of the cell membrane is such that it favors the movement of potassium relative to sodium ions. Because the rate of crossing for potassium ions that exit the cell is higher than that for sodium ions that enter the cell, the inside portion of the cell is left with an overload of negatively charged particles, namely, proteins that contain a negative charge.*

PARAPHRASING

- Here is an Inappropriate Paraphrase of the above material:
- *Because the intracellular concentration of potassium ions is high, potassium ions tend to diffuse out of the cell. This movement is triggered by the concentration gradient for potassium ions. Similarly, the concentration gradient for sodium ions tends to promote their movement into the cell. However, the cell membrane is much more permeable to potassium ions than to it is to sodium ions. As a result, potassium ions diffuse out of the cell more rapidly than sodium ions enter the cytoplasm. The cell therefore experiences a _ loss of positive charges, and as a result the interior of the cell membrane contains a surplus of negative charges, primarily from negatively charged proteins.¹ (p. 204).*

WHEN PARAPHRASING AND SUMMARIZING

- Action during the writing process
- First, write your paraphrase and summary without looking at the original text, so you rely only on your memory.
- Next, check your version with the original for content, accuracy, and mistakenly borrowed phrases
- Appearance on the finished product
- Begin your summary with a statement giving credit to the source:
According to Jonathan Kozol, ...
- Put any unique words or phrases that you cannot change, or do not want to change, in quotation marks: ... *"savage inequalities" exist throughout our educational system* (Kozol 1992: 1).
- Ensure you note exact page numbers in the reference

■ Source:
http://owl.english.purdue.edu/handouts/research/r_plagiar.html

EFFECTIVE PARAPHRASING

- Choose which of these are the 6 Best Steps to Effective Paraphrasing:
 1. Read over the text several times until you grasp its full meaning.
 2. Quoting whenever possible because paraphrasing is not credible.
 3. Set the original text aside, and write your paraphrase on a note card or sheet of paper.
 4. On the note card, jot down the subject of the paraphrase and a few key words that will help you put this information in context later on in your paper.
 5. Cut and paste the information you want in your paper without citing it until you are done.

EFFECTIVE PARAPHRASING

- ~~Go back and check your notes to make sure you~~
included all the necessary information
- that was in the original material.
- 7. Use quotation marks to identify unique words or terminology that you borrowed directly
- from the original material.
- 8. Do not waste your time understanding the text, just use its ideas however you would like.
- 9. Record the bibliographic information on the note card so you can easily refer to it if you use the material in your paper.
- Answer: ? ? ? ? ? ?

AS YOU TAKE NOTES:

- Include page numbers and source references so you can go back and check for accuracy as you write.

AS YOU TAKE NOTES:

Action during the writing process

- Mark *everything* that is someone else's words with a big **Q** (for **quote**) or with big quotation marks
- Indicate in your notes which ideas are taken from sources (**S**) and which are your own insights (**ME**)
- Record all of the relevant documentation information in your notes
- Ensure you note exact page numbers in the reference

Source: http://owl.english.purdue.edu/handouts/research/r_plagiar.html

DON'T

- Cut and paste from any source
- Use another student's work as your own
- Just change a few words from any source for your paper
- Turn in a paper you wrote for another class

YOU CAN PREVENT PLAGIARISM (STEALING WORDS AND IDEAS)

- All you need to do is:
 - Take notes—put in your own words.
 - If you do copy words, put “ ” around them and footnote whose words they are.
 - Keep track of **EVERY** resource you use!
 - Cite all of your sources at the end of your work.

TYPES OF PLAGIARISM:

■ Intentional

- Copying a friend's work
- Buying or borrowing papers
- Cutting and pasting blocks of text from electronic sources without documenting
- Media “borrowing” without documentation

■ Unintentional

- Careless paraphrasing
- Poor documentation
- Failure to use your own “voice”

UNINTENTIONAL PLAGIARISM

- Paraphrasing poorly: changing a few words without changing the sentence structure of the original, or changing the sentence structure but not the words.
- Quoting poorly: putting quotation marks around part of a quotation but not around all of it, or putting quotation marks around a passage that is partly paraphrased and partly quoted.
- Citing poorly: omitting an occasional citation or citing inaccurately.

INTENTIONAL PLAGIARISM

- Passing off as one's own pre-written papers from the Internet or other sources.
- Copying an essay or article from the Internet, on-line source, or electronic database without quoting or giving credit.
- Cutting and pasting from more than one source to create a paper without quoting or giving credit.
- Borrowing words or ideas from other students or sources without giving credit.

TYPES OF PLAGIARISM

- Word for word (Direct, Text)
- Mosaic / Structure
- Thesaurus (*Paraphrase*)
- Ideas
- Authorship
- Secondary sources
- Self plagiarism

TYPES OF PLAGIARISM

■ **Plagiarism of Words**

- The use of another's exact words without citing the author
- **Incorrect**
 - Plagiarism is the reproduction of someone else's words, ideas or findings and presenting them as one's own without proper acknowledgement.
- **Correct**
 - Plagiarism is the “reproduction of someone else's words, ideas or findings and presenting them as one's own without proper acknowledgement”
(Undergraduate Course Handbook: 2008, p.24)

TYPES OF PLAGIARISM

■ **Plagiarism of Structure**

- **Paraphrasing another's words by changing sentence construction or word choice with citation**
- **Paraphrasing while maintaining original sentence construction with acknowledging the source**

TYPES OF PLAGIARISM

- **Plagiarism of Ideas**
 - **Presenting another's ideas as your own without giving the person credit**
 - **Submitting a paper without citing or incorrectly citing another's ideas**

TYPES OF PLAGIARISM

■ Plagiarism of Authorship

- **Turning in a replication of another's work**
- **Submitting a paper that you got off the internet or from a friend and presenting it as your own**

TYPES OF PLAGIARISM

Form of Self

- **The use of previous work for a separate assignment**
- **Although these were your original words and thoughts, receiving credit for a previous assignment is considered cheating**

SELF-PLAGIARISM

- The practice of an author using portions of their previous writings on the same topic in another of their publications, without specifically citing it formally in quotes.
- This practice is widespread and at times unintentional
- Violates the copyright that has been assigned to the publisher
- No consensus whether this is scientific misconduct

FAIR USE OF INTELLECTUAL PROPERTY

- use of a copyrighted work for purposes such as criticism, comment, news reporting, teaching or scholarship.
- use copyrighted materials without seeking permission from the creator or publisher and without paying copyright fees.

Does not mean that you
can plagiarize!!

12,500 USD

COPYRIGHT AND PLAGIARISM

- Plagiarism issues are not strictly related to copyright issues - though the two may overlap.
- Copyright is a legal concept; plagiarism is literary and more of an ethical issue.
- Publishers are more worried about copyright violation.

10 TYPES OF PLAGIARISM

- The Plagiarism Spectrum identifies 10 types of plagiarism based on findings from a worldwide survey of nearly 900 secondary and higher education instructors.

**WHICH OF THE FOLLOWING
FIVE CASES IS/ARE
PLAGIARISM?**

1

At the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

At the beginning, the idea of sovereignty was the idea that there us a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

2

At the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

In its earliest manifestations ‘sovereignty’ was thought to capture the idea that there is an ultimate locus of authority within a given political community. More recent usage tags on the idea that, in addition, no absolute and ultimate authority over that community exists elsewhere.

3

At the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

As Hinsley (1986) argues, the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

At the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

As one authoritative source puts it: ‘at the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”’. (Hinsley, 1986: 25-6).

5

At the beginning, at any rate, the idea of sovereignty was the idea that there is a final and absolute political authority in the political community; and everything that needs to be added to complete the definition is added if this statement is continued in the following words: “and no final and absolute authority exists elsewhere”.

The discussion of sovereignty has evolved from the classical notion of ‘final and absolute authority in a political community’ (Hinsley, 1986: 25). These days the term also encompasses the idea that there is no final authority elsewhere (Hinsley, 1986: 26)
